

GitHub Language Popularity Overview

Analysis based on stars and forks (log-scaled)

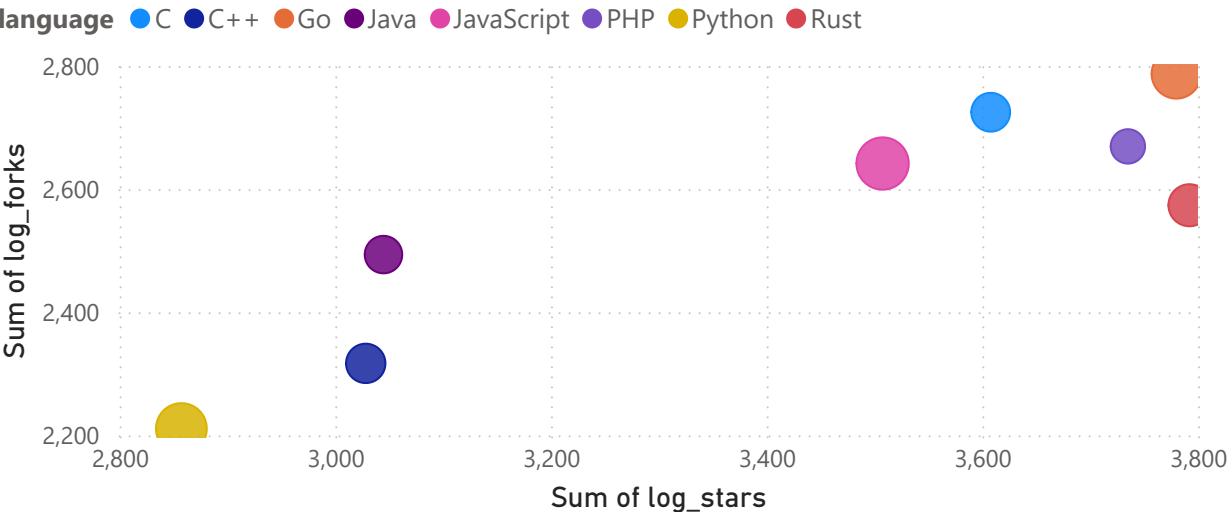

Distribution of Log(Stars)

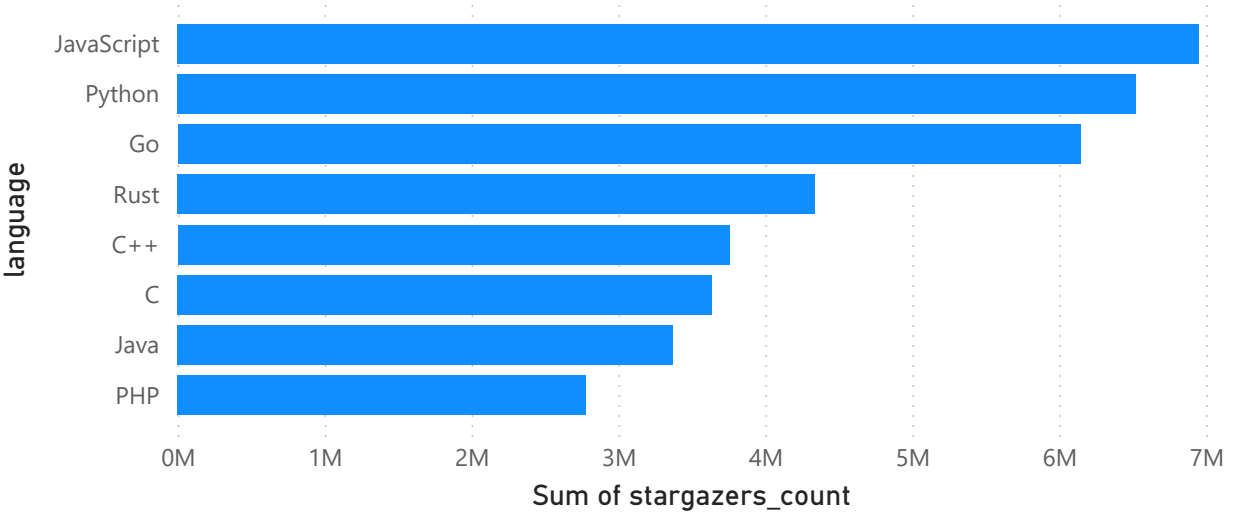

Average Stars per Repository

Forks vs Stars (Log Scale)

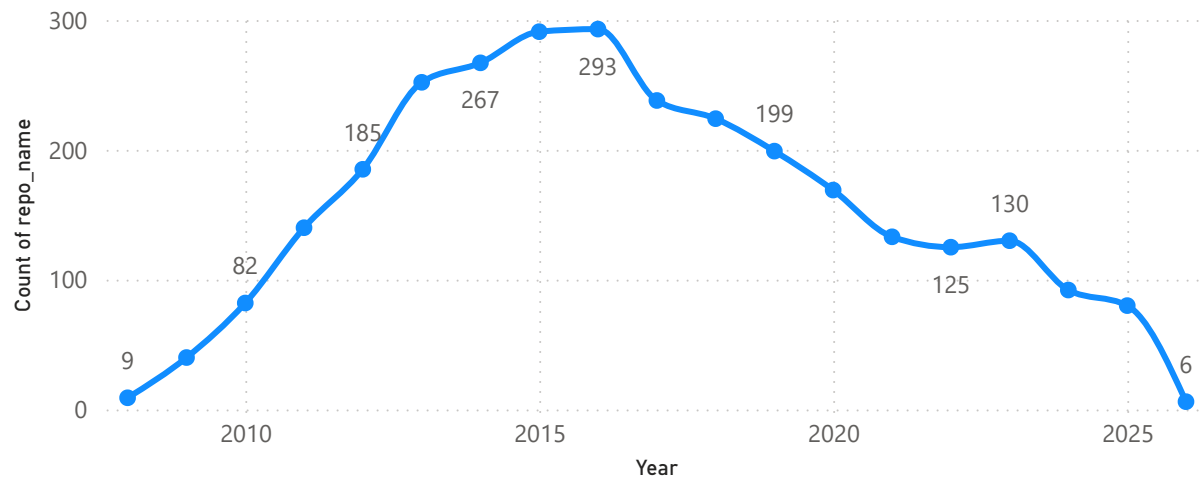

Total Stars by Language

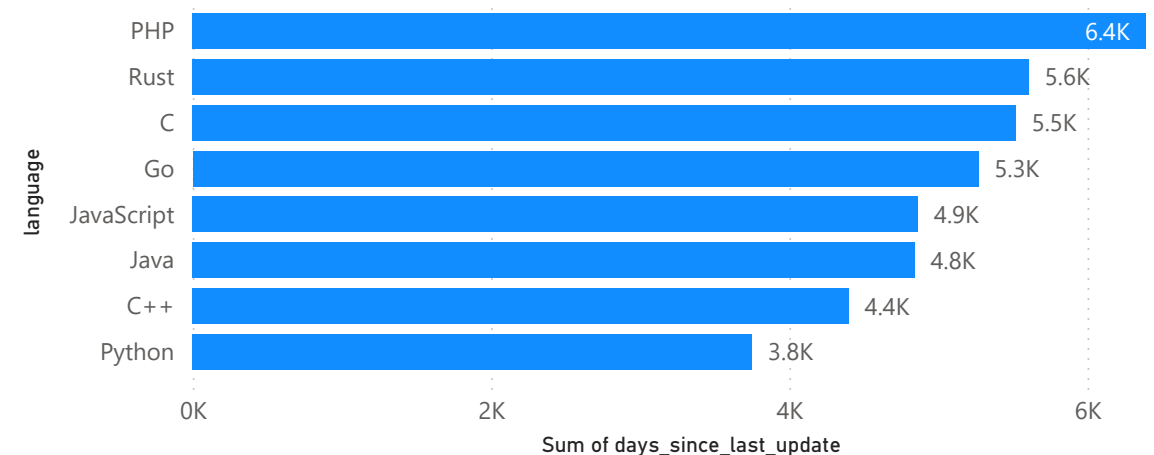

Time & Activity Analysis

Repository creation trends and maintenance health

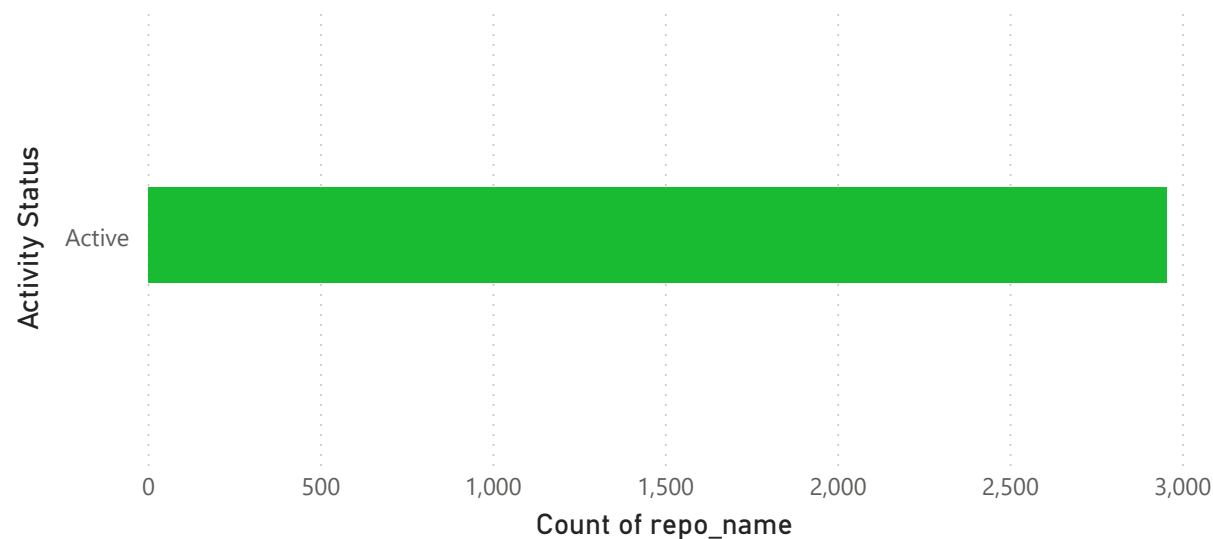

Repositories Created Per Year

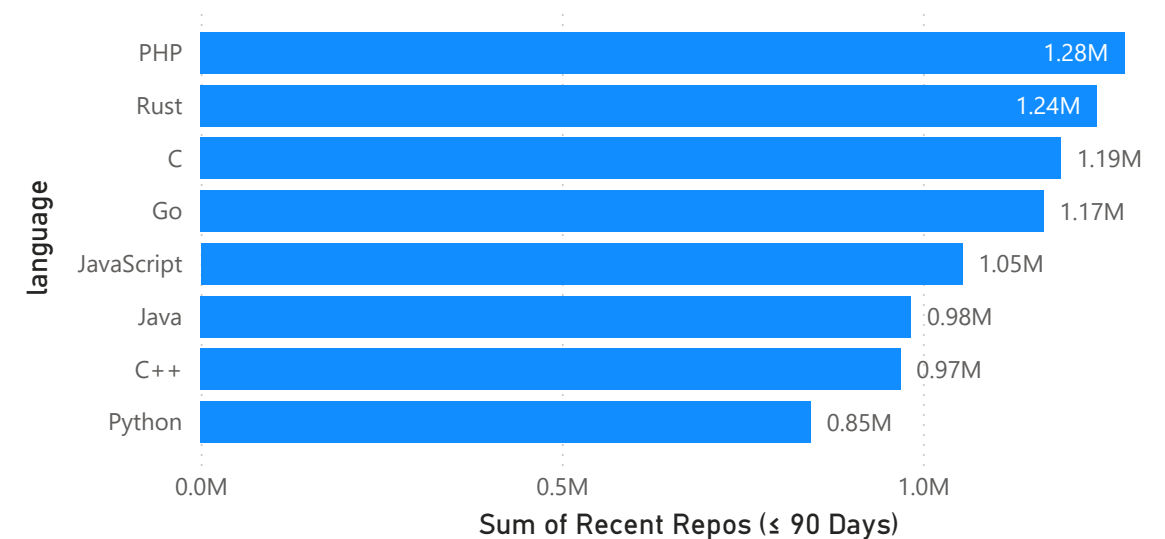

Average Maintenance Delay by Language

Active vs Inactive Repositories

Recently Updated Repositories (≤ 90 Days)

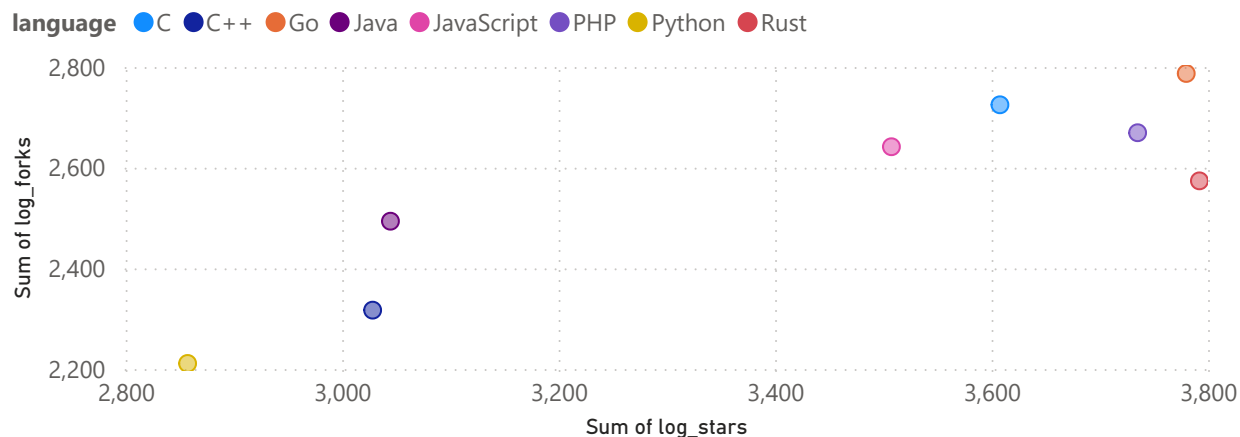

Stars Distribution and Correlation Analysis

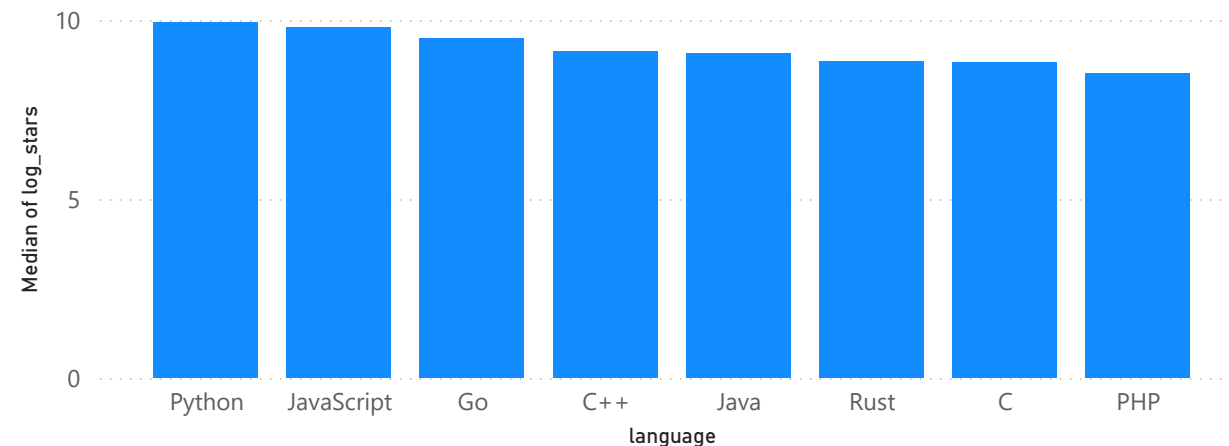

Statistical distribution and relationship between popularity metrics

LOG(STAR) DISTRIBUTION BY LANGUAGE

Sum of log_stars and Sum of log_forks by language

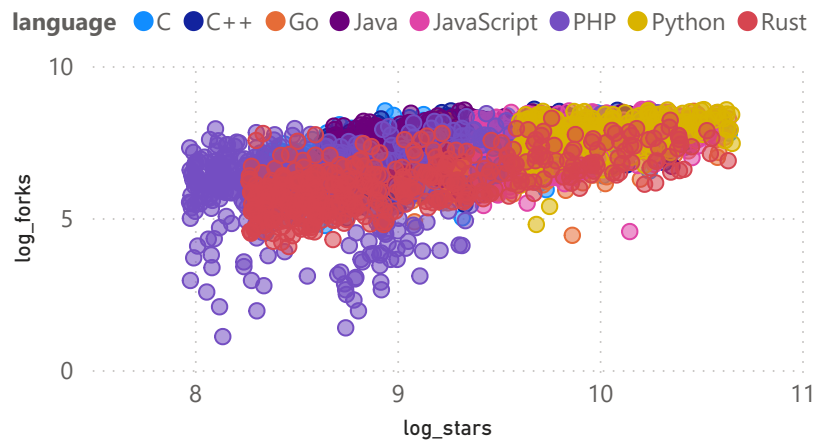

Median of log_stars by language

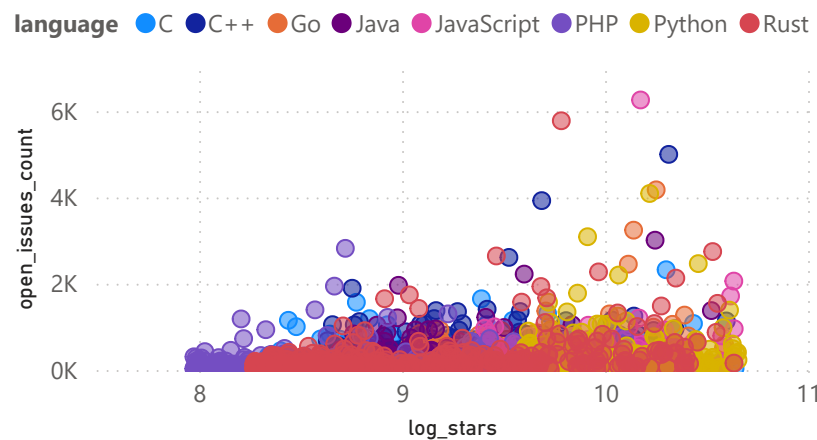

Repository Metrics Correlation Analysis

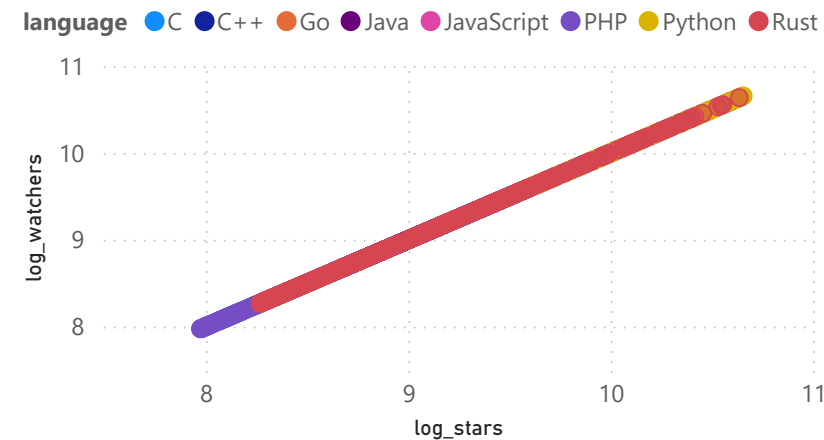

log_stars vs log_forks

log_stars vs open_issues_count

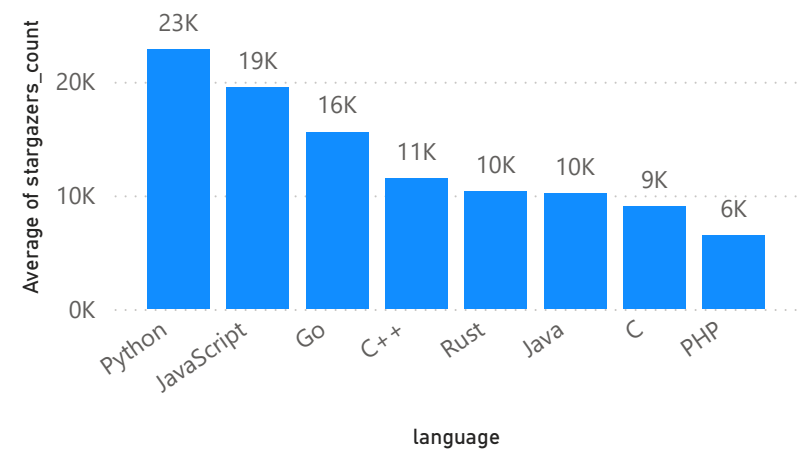

log_stars vs log_watchers

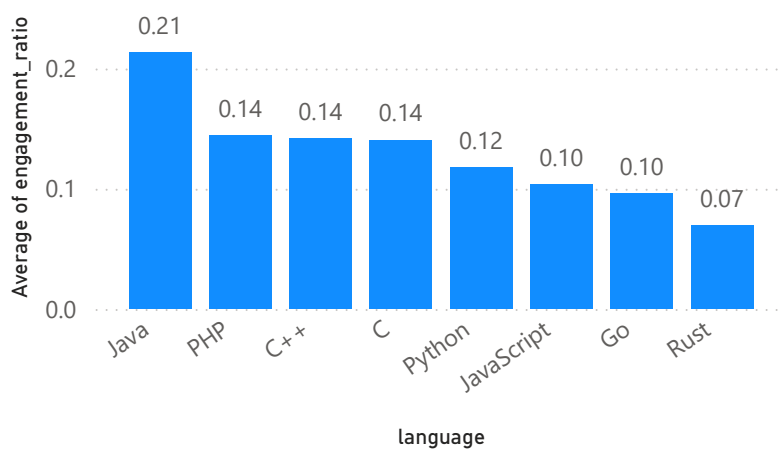

Language Performance

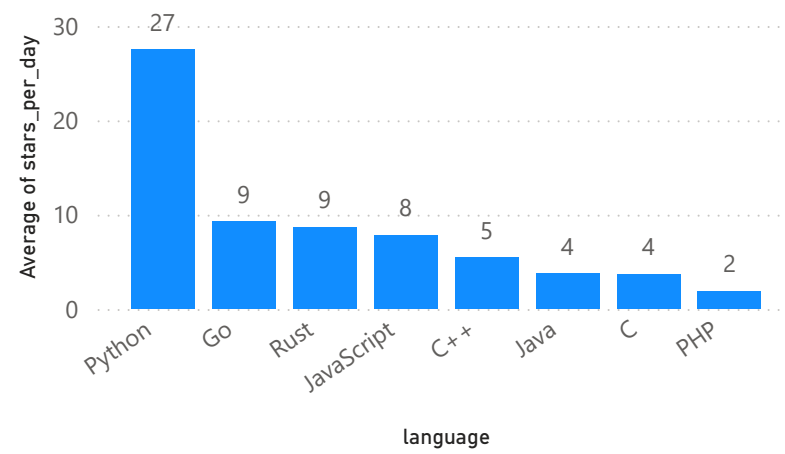

Average Stars per Language

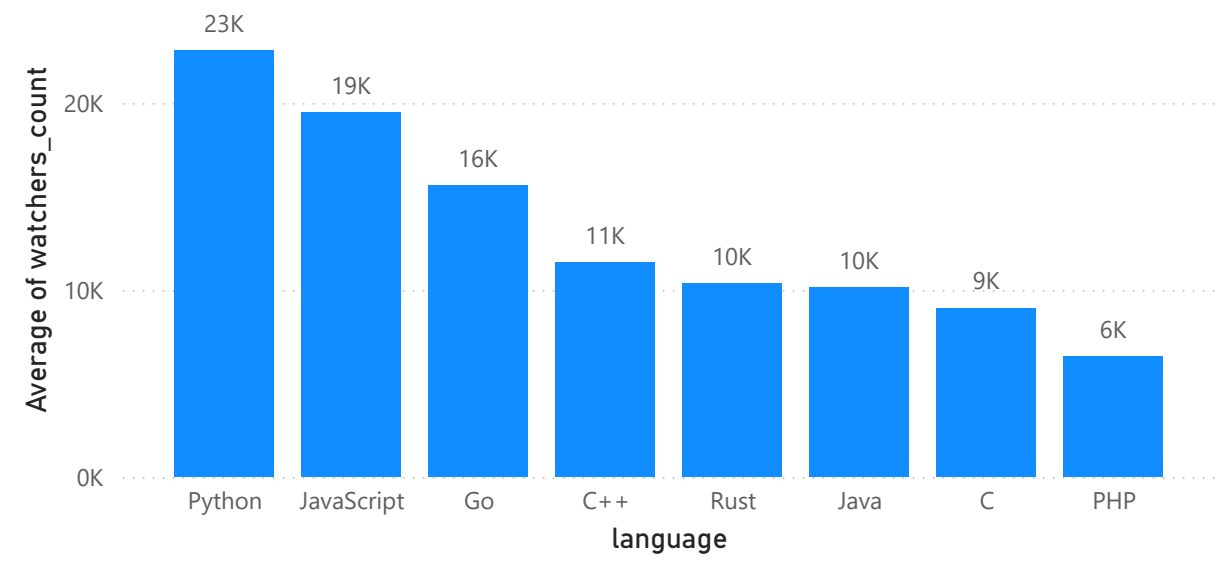

Average Engagement Ratio per Language

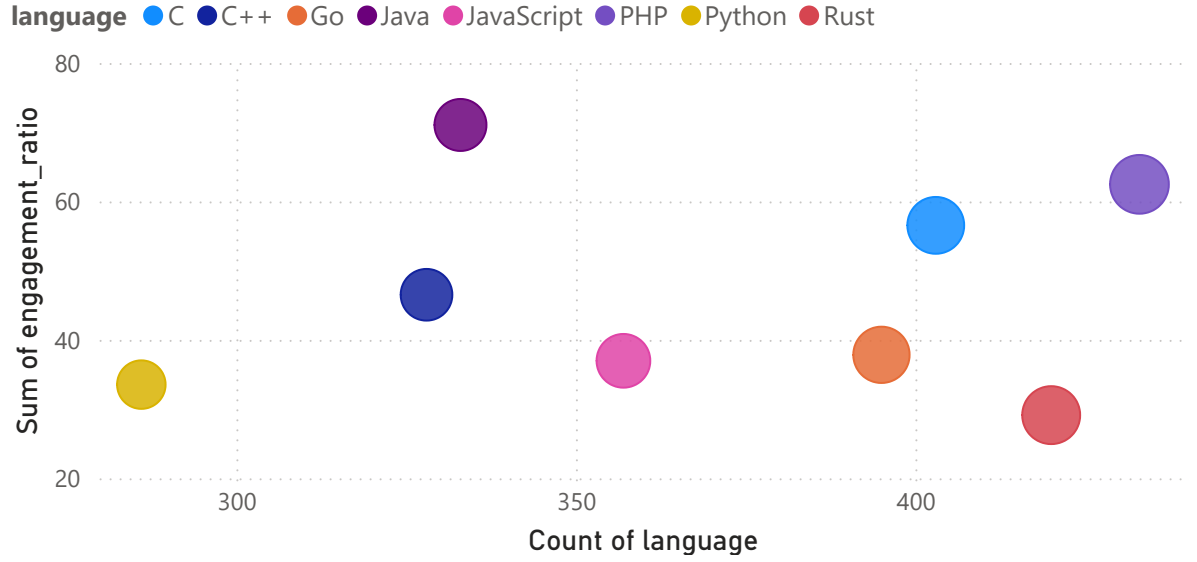

Stars per Day per Language

Average Watchers per Language

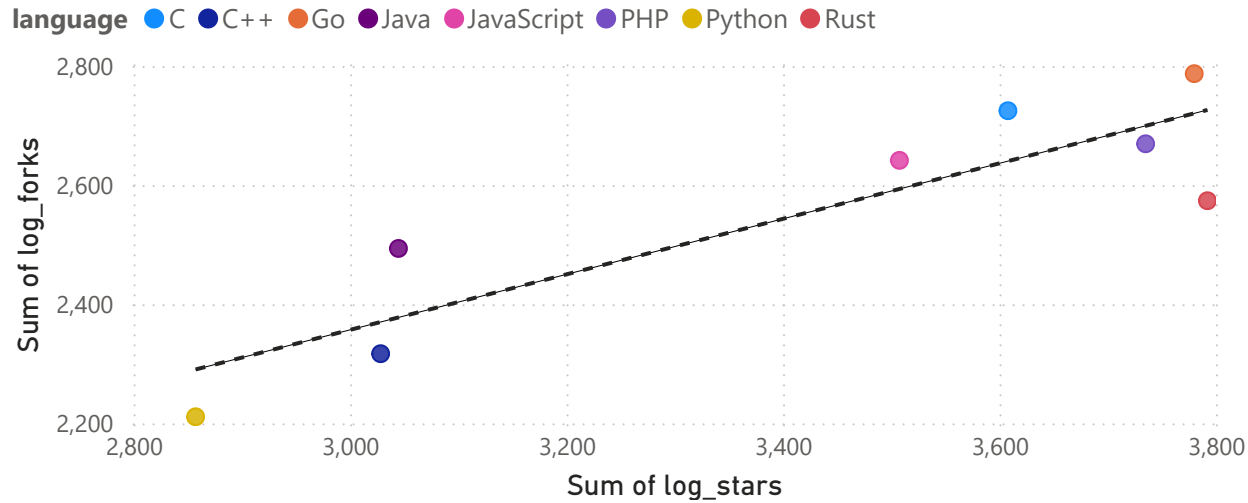

Ecosystem Size vs Engagement Quality

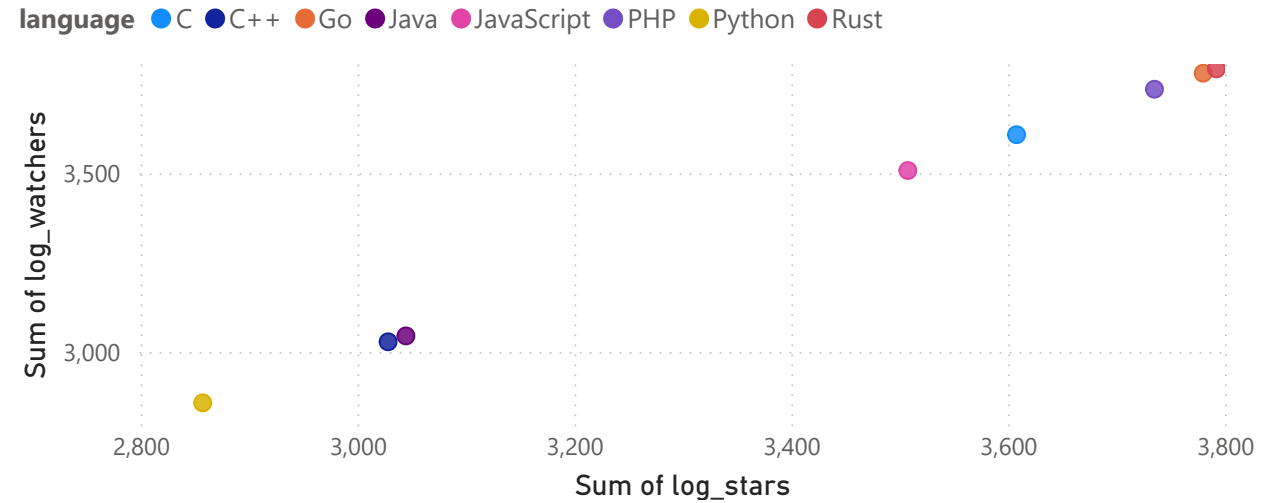

Popularity & Correlation

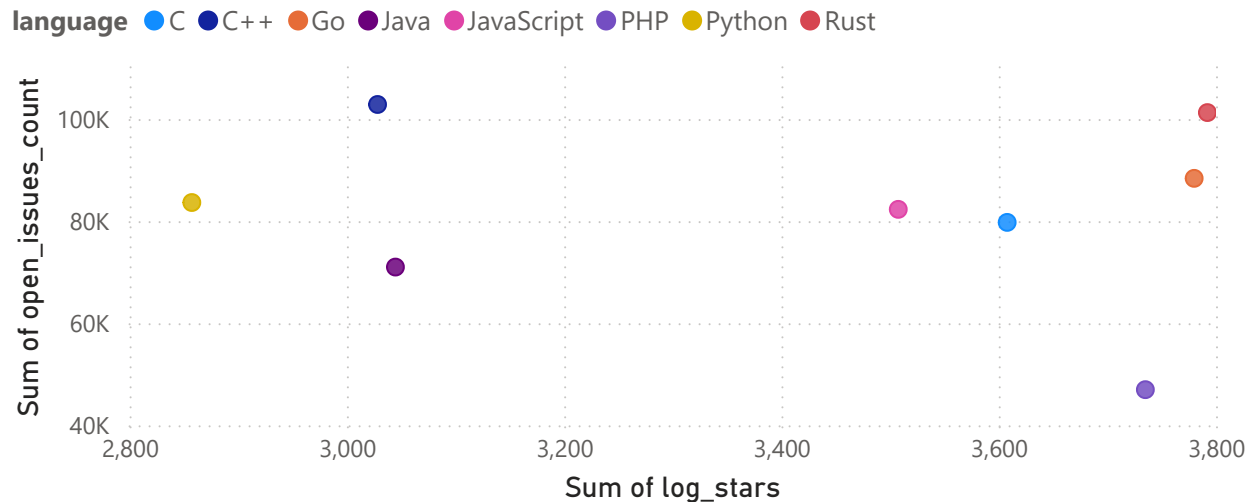

Popularity vs Community Contribution

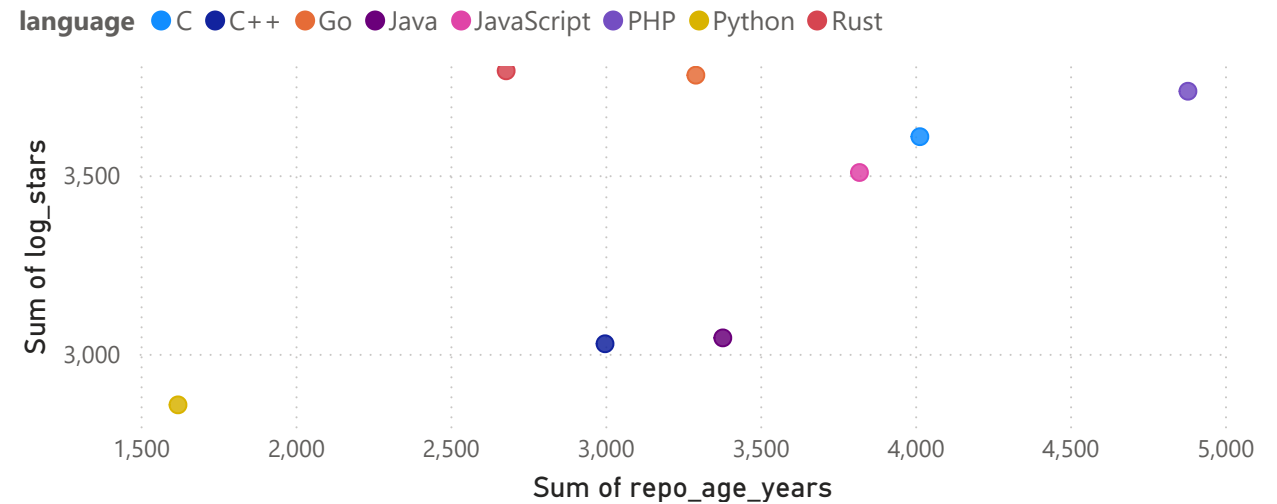

Stars vs Watchers Correlation

Popularity vs Maintenance Pressure

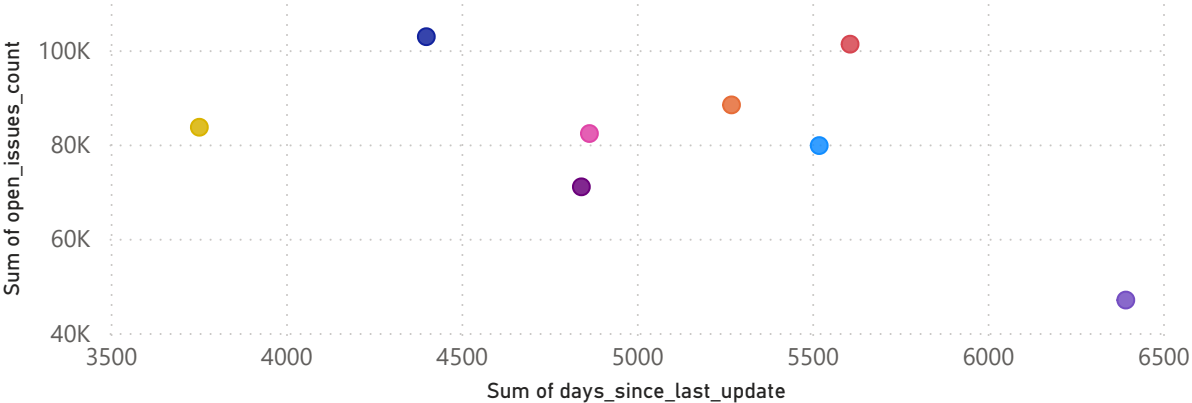

Repository Age vs Popularity

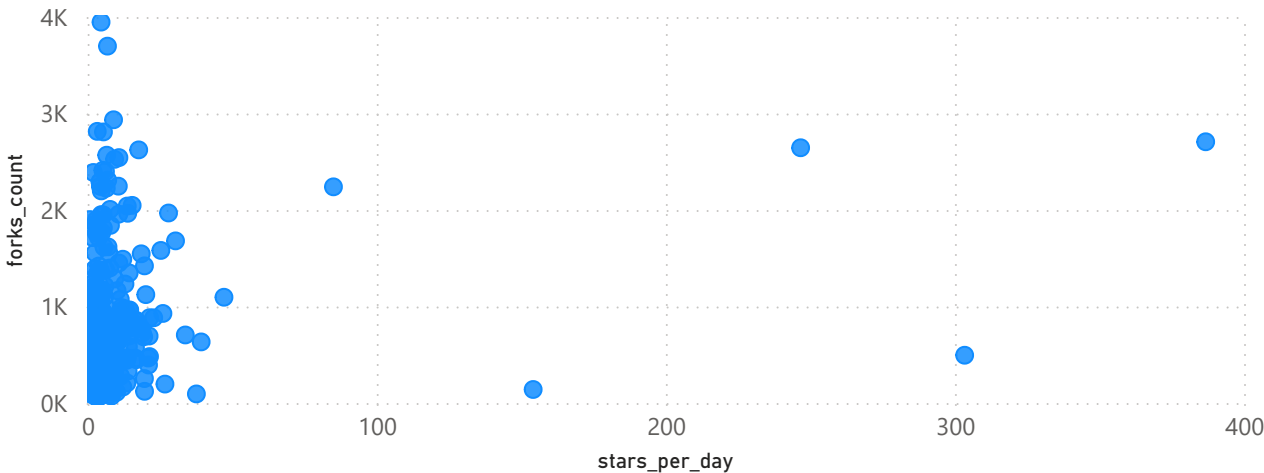

Maintenance & Activity

Activity Load vs Maintenance Backlog

language C C++ Go Java JavaScript PHP Python Rust

Rust: Growth vs Contribution

PHP: Top 10 by Open Issues
